

Erratum to: Solving the flagpole problem *

Alexander Gebharder's „Solving the flagpole problem“ (in vol. 44, no. 1, 2013) contains two typos.

In step 3 of the SGS algorithm presented on p. 65 there appears a 'Y' instead of a 'Z' twice. In particular, step 3 of the SGS algorithm should read as follows (corrected passages are underlined): “For all $X, Y, Z \in V$: If $X-Y-Z$ (or $X \rightarrow Y-Z$) and X and Z are non-adjacent (not $X-Z$), then orient $X-Y-Z$ (and accordingly $X \rightarrow Y-Z$) as $X \rightarrow Y \leftarrow Z$ in the graph resulting from step 2 if and only if X and Z are probabilistically dependent conditional on every subset M of $V \setminus \{X, Z\}$ with $Y \in M$.”
